PROJECTS

CRA Immigration — Law firm website & blog

cra-immigration-demo.netlify.app

Utilized React reusable components and state management to create a maintainable, interactive UI.

Set up headless CMS Contentful as the data source for the blog while securing API key and access token with Netlify serverless functions.

Leveraged several npm packages for features like page transitions, scroll animations, swipeable carousel, and markdown support for blog text.

Movie Search App – Search movies using a REST API

moviesearchappjs.netlify.app

Developed responsive layout using a mobile-first approach.

Asynchronously obtain data from the Open Movie Database and YouTube APIs.

Implement styles with SASS for improved file structure and maintainability.

Rad Bikes — Front end for an e-commerce bike shop

radbikes.netlify.app

Utilized hashchange event listeners for navigation without any libraries or frameworks.

Created a fully responsive design using media queries, scalable units, CSS grid, and flexbox.

Applied JavaScript fundamentals to create shop filters and CRUD shopping cart functionality.

EXPERIENCE

Ironworkers Local 86 Seattle, WA — *Foreman*

OCTOBER 2012 - MAY 2021

Consistently reduced install time and saved over 3,000 labor hours on the Nexus high-rise project.

Solved problems by implementing best practices and applying critical thinking skills to find solutions.

Successfully managed an 8-12 person crew in high pressure situations through effective teamwork, time-management, and conflict resolution.

SKILLS

React.js

SASS / SCSS

HTML
